

WHO WE ARE

Professional Programs is a family run business that has been partnering with conferences nationwide since 1988. We offer audio recording services as well as mobile bookstores for a wide variety of conferences. Customer service and experience is one of our top priorities. From small retreat centers to metropolitan convention halls, Professional Programs has the experience, staff, stock and equipment to preserve YOUR important event!

BOOKSTORE

The Professional Programs Bookstore is an independent bookstore serving the conference and trade show community.

Let us add value to your conference! An on-site bookstore enhances your attendees' learning experience. We bring our extensive selection of top sellers, books suited to your specific audience, and any books written by or recommended by your speakers.

Having a wide selection of books to choose from at the conference serves as an extension of the conference experience and allows attendees to hold on to and share the enthusiasm the conference has generated.

Regardless of subject matter, Professional Programs can create a custom bookstore for your conference and meet the specific needs of your attendees.

AUDIO RECORDING

Professional Programs has provided professional recording services for corporate, educational, industrial, and business and trade associations throughout the United States and Canada.

From conference and seminar recordings to multi-concurrent session conventions; our onsite recording programs provide the tools your members and attendees want. When multiple sessions are scheduled concurrently, the availability of CDs, Audio DVDs, and Downloads are invaluable to those attendees who may miss a seminar they would like to hear. Each audio session is edited through top of the line software and the final product comes out in pristine condition.
